Keynote Address: Thursday 4 December, 3.45-5.00pm

Jake Grumbach (University of California, Berkeley)

Professor Grumbach is an award-winning scholar of American political economy and a leading voice on the study of democratic institutions and public policy in the United States. His research uses advanced quantitative methods to investigate how political institutions and policies shape democracy, federalism, labor relations, and racial and economic inequality. His research has appeared in top academic journals, including the *American Political Science Review*, *American Journal of Political Science*, *Journal of Politics*, *Perspectives on Politics*, and other leading outlets in political science.

He is the author of *Laboratories Against Democracy: How National Parties Transformed State Politics* (Princeton

University Press, 2022), a groundbreaking study of the nationalization of state-level politics and its effects on American democracy, which won the 2023 APSA Merze Tate – Elinor Ostrom Outstanding Book Award. Named one of The New Yorker's 100 Best Books, the book argues that the nationalization of the Democratic and Republican parties has disrupted American federalism. Grumbach's recent research focuses on money in politics, gerontocracy, the labor movement, and the politics of racial and economic inequality.
